SENATE BILL

No. 687

Introduced by Senator Simitian

February 22, 2005

An act to ~~add Sections 33126 and 33126.15 to~~ *amend Section 33126 of, and to add Section 33126.15 to,* the Education Code, relating to school accountability.

LEGISLATIVE COUNSEL'S DIGEST

SB 687, as amended, Simitian. State accountability report card: reporting requirements: standardized template: review and revisions.

The Classroom Instructional Improvement and Accountability Act requires each school district to develop and implement a school accountability report card, as prescribed. The act prohibits any change to its provisions, except a change to further its purpose enacted by a bill passed by a vote of $\frac{2}{3}$ of the Legislature and signed by the Governor.

The act requires that the school accountability report card provide data by which a parent can make meaningful comparisons between public schools that will enable him or her to make informed decisions on which school to enroll his or her children, including providing an assessment of estimated expenditures per pupil, among other assessments.

This bill would impose a state-mandated local program by specifying reporting requirements for the assessment of estimated expenditures per pupil, and would require that assessment of estimated expenditures per pupil include salaries of personnel at the schoolsite, as specified.

Existing law also requires the State Department of Education to develop and recommend for adoption by the State Board of Education a standardized template intended to simplify the process for completing the school accountability report card and to make the school accountability report card more meaningful to the public.

This bill would require that the department, by _____ July 1, 2006, recommend for adoption by the State Board of Education a revision to the standardized template, described above.

The bill would require that the revision to the standardized template recommended by the department include *a field for reporting the actual restricted funding, per pupil, allocated for the specific benefit of the school or for the benefit of all schools in the district equally.* The bill would also require that this revision to the standardized template include a comparison of the actual unrestricted funding per pupil allocated for the specific benefit of the school or for the benefit of all schools in the district equally, compared to the districtwide average and the state average of the same computation, and also a comparison of the average of actual salaries paid to certificated instructional personnel, compared to the districtwide average and state average of the same computation.

This bill would declare that these provisions further the purposes of the Classroom Instructional Improvement and Accountability Act.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Vote: $\frac{2}{3}$. Appropriation: no. Fiscal committee: yes.
State-mandated local program: yes.
